

# MEASURING FOR YOUR COUNTERTOP

In order to get the most accurate estimate for your new countertops you may want to measure your existing countertops prior to meeting with a Priority One Flooring Sales Associate. Below are step by step instructions on how to measure your existing countertops. You can use the graph paper on the back of this page to draw your kitchen countertop configuration and record your measurements. Once completed, you can tear out the sheet along the perforated edge and bring with you to a Priority One Flooring custom countertop location to consult with one of our Sales Associates.

## EXAMPLE

COUNTERTOP MEASUREMENTS				
	LENGTH		WIDTH	SQ. INCHES
1.	72"	X	36"	= 2,592
2.	96"	X	25.5"	= 2,448
3.	24"	X	25.5"	= 612
4.	24"	X	25.5"	= 612
Total				= 6,264

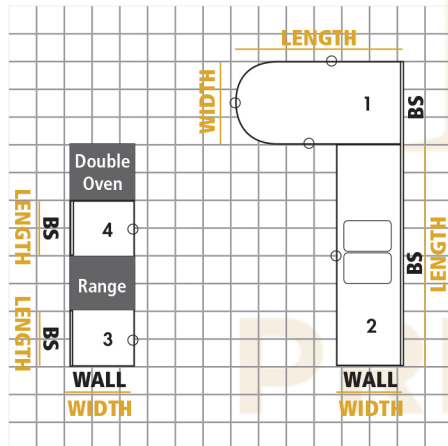

## EXAMPLE

CONVERT TO SQUARE FEET	
Total Square Inches	6,264
Divide by 144 ÷	144
Total Square Feet =	43.5

## MEASURE YOUR COUNTERTOP

- Measure the dimensions of each countertop section in inches, both the length and width, as shown in the example diagram to the left. Be sure to round all numbers to the nearest half-inch.
- Record the measurements in the table provided on the back of this page as you measure each section of your countertop.
- Multiply the length times the width for each section to get the sections area in square inches.
- Total the area for each section to get the total square inches for your countertops.
- Divide the total square inch area by 144 to get the total square footage of your countertops.

## EXAMPLE

## DRAW YOUR KITCHEN

Using the graph paper on the back of this page, draw the layout of your countertops. To aid you in your drawing, each of the squares of the graph paper represent 1' x 1' square.

Identify where there are:

- edges that will be finished (use a "0" to indicate a finished edge)
- walls
- areas where a backsplash will be (use a "BS" to indicate a backsplash)
- cooktops
- free standing and drop-in ranges
- dishwasher
- refrigerator
- sink

## BRING THE COMPLETED WORKSHEET TO PRIORITY ONE FLOORING

Tear out the completed worksheet along the perforated edge along the left hand side and bring it to the Priority One Flooring Sales Associate at a Priority One Flooring custom countertop location.

This worksheet will be used for estimation purposes ONLY and is NOT a contract. The actual measurements for your countertop may differ from what is recorded on this worksheet. Therefore your total cost for your countertop may differ from what may be provided as an estimated cost based on the measurements here. If you decide to purchase your countertops from Priority One Flooring, measurements will be taken by a professional Certified Countertop Fabricator/Installer prior to the fabrication and installation of your countertops.

This estimate is non-binding and subject to change. Your exact price will be calculated by the Designer/Associate after a measurement by a professional fabricator. Minimum order quantities may apply. This estimate is provided for general information and illustration purposes only; the results are to be used only as an estimate and are not intended as a resource applicable to any specific circumstances and should not be relied upon or used as such.

Measurement fee will be credited to your countertop purchase
